Case 1

Household brand · center move

Issue Stock moved from another warehouse arrived with up to 35 SKUs mixed on a single pallet.

Action We re-sorted each pallet, registered stock in the WMS, and set up shelf picking stations for fast-moving small items.

Result Shipping resumed right after the move, and item-level re-sorting and a stock count stabilized operations.

Case 2

Promotions · peak volume

Issue Promotions and retailer DC deliveries concentrated volume into a short window.

Action We set the work method by order count, SKU count and single-item ratio, split work across stations and added space at Uiwang.

Result Orders taken a week ahead let us plan staff and equipment and ship on the delivery schedule.
